## TENDENCI BUSINESS DIRECTORIES

**Tendenci® integrated business directory software is designed to help you share your preferred provider network.**

Directory listings also are a great source of revenue for your organization, and they benefit your members by bringing them more business! They are search-engine friendly, too!

### GRAPHICALLY SHOWS COMPANY LOGOS

Tendenci's **business directory listings** allow your member companies to list their company information including their logo branding. This visual touch allows easy recognition and highlights your companies quickly.
